

*Specializing in
Architectural &
Landscape Stone*

About Montana Rockworks...

Working with Montana Rockworks is working directly with the source. Operating several quarries and a complete sawing facility allows for customization on your project with multiple grades of landscape and full thickness stone as well as thin veneer. When choosing stone for your next project, choose Montana Rockworks for unparalleled reliability and quality control. Your expectations will be met today and for decades to come.

MIGHTY C INC

**The Most Innovative Tool to Hit the
Masonry Industry in Decades!**

What Our Customers Are Saying...

"I have been a stone mason for 35 years. The Mighty C is absolutely incredible. It is the best tool I have ever come across. We use it every day and we are already thinking of buying another one."

Fred Castaldo of Fred Castaldo Masonry
Steamboat Springs, CO

"We have found the Mighty C to be three times faster than saw cutting. Due to the C's portability for indoor use and the elimination of dust from saw cutting, we are going to buy another one."

Chris Akins of Chris Akins Masonry
Spokane, WA

"Coming from a masonry family of over 50 years, The Mighty C is the most innovative tool we have ever used. It helps us give our clients the traditional masonry style and eliminates saw cutting. Thereby reducing air pollution and costly clean up time. We love it."

Jack & Nick Delavan of Delavan Masonry
Coeur d'Alene, ID

**"The Mighty C
is the most
innovative tool
we have ever
used"**

**"This is
exactly what
our industry
needed"**
